## For its 2022 edition, ALL4PACK Emballage Paris is clearly positioned on environmental issues:

depletion of non-renewable resources, limited recyclability, greenhouse gas emissions, etc., packaging is facing new challenges and must renew itself. This is why the show invites its exhibitors and visitors to lead the change and actively participate in the creation of innovative and more sustainable solutions. This approach also applies to the show, which is committed to implementing various actions for a more responsible event

---

### Make a durable and optimize the eco-design approach of our event

- Dematerialization of visitor access badges.
- Provision of cardboard badge holders for exhibitors.
- Limiting the printing of exhibition materials.
- All documents are printed on recycled paper or paper from sustainably managed forests.
- Restriction of goodies.

#### focus exhibitors:

- Propose more virtuous stands to our customers.
- Supporting our exhibitors with a material library.

### Achieve 50% recycled waste generated by the event

- Sharing of spaces, structures and furniture between several Comexposium trade fairs at the Exhibition Centre between September and November 2022.
- Provision of self-service water fountains in our common areas.
- Improving communication with our exhibitors and visitors on good sorting practices.
- A place with multiple environmental initiatives
  - Towards 100% renewable energy electricity*
  - Optimizing energy consumption*
  - Supporting sustainable mobility (shuttles from the airports and served by the RER)*

#### focus exhibitors:

- Sorting and recycling of the show's waste (stands and common areas - at the opening) with our cleaning partner.
- Supporting our exhibitors in this process by reserving skips/wagons for sorting and setting up inventories (during set-up and dismantling).

### Raise awareness of CSR issues and promote inclusion, solidarity and employment

- Content dedicated to CSR themes in the event.
- Raising visitors' awareness during speeches prior to the show.
- People with disabilities: special welcome and personalized services (loan of mechanical wheelchairs, dedicated number for access from the parking lots).
- Students and the future of the profession: the free exhibition allows students to meet exhibitors, discover the sector's professions and meet recruiters

As part of the government's plan to reduce energy consumption, Comexposium, organizer of trade and consumer events including ALL4PACK Emballage Paris, is committed for a **responsible energy consumption**: reduction of the **heating** level by 10%, shutting down **equipment and lighting** when the event is closed, encourage exhibitors to **turn off their stands** and **optimize their lighting**
